4

A - Good gloves can help keep your hands from getting sore, tired, or cold, as well as offer protection in the event of a spill.

B - The recommended protective footwear is a pair of strong, over-the-ankle boots with low heels to help prevent your feet from slipping off the footrests.

C - A face shield or goggles will provide you with more protection and should be free from scratches. They should be fastened securely and be well ventilated to prevent fogging.

D - It is important to protect your skin from scratches. A long-sleeved shirt or jersey and long pants are minimum requirements for rider protection.

5

E - Your helmet is the most important piece of protective gear for safe riding. A helmet can help prevent a serious head injury.

6

F - Off-highway riding gear such as off highway pants with kneepads, jersey, and chest/ shoulder protectors provides better protection.

Why is it important for you to "Ride within your ability"
